

Eradicate Paper Invoices and Paper Checks Forever

- They still scan paper invoice just to extract data. *We eradicated paper forever.*
- They worried about the efficiency of paying multiple bills with multiple passwords at multiple sites.

We made those concerns disappear – along with those stamps they had to lick.

Our Clients use their own Accounts Payable systems, not the Billers' Account Receivable system. Our Clients need to learn only their system.

- They had privacy concerns. *We solved them.*
- They had security concerns. *We addressed them.*
- Concerns over bank overdrafts and charges. *We prevented it.*
- Who can debit your bank account? *No one... if you are using eBILIS® EIPP. Our payer's bank account information is not disclosed to the biller.*
- Payers have more trust in the process when their financial information is in their own systems, not "Out there" somewhere in cyberspace.
- Biller - A/R Solution? Payer - A/P Solution? Bill Aggregation? We've perfected it.

Our scalable, customizable, robust eBILIS® EIPP is faster and easier to install. It's affordable too and will not break-your-bank!

Retain your legacy systems... enjoy painless progress.
